

Second Nature - *Environmental Extravaganza*

Today we learned

In honor of our last lesson, we've had an environmental extravaganza! Together we reviewed some of the terms and concepts that were taught over the course of Sprout Up Explores!

Now at home

Activity 1 - Sprout Up Explores Review

Have a conversation with your child about everything they've learned while participating in Sprout Up Explores. What was their favorite lesson? Do they remember any exciting facts from that lesson? Do they remember any specific tips on what they can do to implement sustainability into their lives and/ your home?

Ask your child to put together a presentation about one thing that they learned. This can include a picture, 3D model, or some written out sentences Your child can also use old funsheets and second nature activities as props! Gather the members of your household and ask your child to present! Encourage some questions from the audience at the end of the presentation! This is a great opportunity for knowledge sharing and presentation practice!

Activity 2 - Environmental Steward Award

Present your child with an Environmental Steward Award! We've included a certificate that you can print at home. Alternatively, you can create your own! For a homemade certificate, you can have your child help you design it in theme with their favorite lesson!

Activity 3 - Parent/Teacher Survey

We loved creating these lessons for our students! Help us improve Sprout Up Explores by telling us what you loved and what you would love to see implemented in the future! The survey should only take about 5 minutes to complete. Access the survey by [clicking here](#).

To send us any photos, videos, or questions, email us at education@sproutup.org!
